## BALL FLOAT TRAP MODULE

S.No.	Description	Quantity
01	Ball Float Steam Trap	01
02	Ball Valve / Globe Valve	02
03	Sight Glass cum NRV	01
04	Strainer with Blow Down Valve	01

### OVERVIEW

- In our experience most of the time the strainer in a module gets clogged. This happens due to negligence as strainers require timely cleaning. Our special strainer comes with an inbuilt Blow Down valve (Refer Catalog Attached). The blow down valve helps in cleaning of the strainer inline and saves a lot of time and effort.
- We also supply a unique Check Sight Glass (Refer Catalog Attached). This sight glass also acts as a check valve. There is a special PTFE ball in the sight glass which helps us see the flow from a distance. The other problem is that in most sight glasses the glass becomes opaque over time and it becomes difficult to see the flow. With our PTFE ball design, you will not be faced with such issues.
- We will also be providing you with a maintenance union/flange. This helps in dismantling and assembly of the float trap within minutes. This saves time and provides easy maintenance.

\*Owing to continuous improvements, product specifications and dimensions are subject to change
